DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin L. Smith on 8/1/2006. The application has been amended as follows:

Claim 18, line 6, after "event", insert -- based upon the bit of the real time bit stream determined to relate to the present time--.

Claim 26, line 9, after "event", insert -- based upon the bit of the real time bit stream determined to relate to the present time--.

Allowable Subject Matter

2. Claims 18-33, which have been renumbered as 1-16 respectively, are allowed.

3. The following is an examiner's statement of reasons for allowance: Regarding claims 1-16, the prior art of record fails to teach of copying the fixed length user bit stream into a real time bit stream, determining what bit of the real time bit stream relates to a present time and determining whether to initiate transmission of a non-synchronous communication event. The closest reference, Haartsen (U.S. Patent Application Pub. No. 2002/0167961), teaches of a wireless transceiver device, comprising: memory for storing synchronous and non-synchronous events; and circuitry defining logic, but fails to fail to teach of copying the fixed length user bit stream into a real time bit stream,

Art Unit: 2616

determining what bit of the real time bit stream relates to a present time and determining whether to initiate transmission of a non-synchronous communication event.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
